> *"No other organization in Mali is doing this type of data-based forecasting. Based on these results, the country was able to predict hotspots more accurately and make sure more health workers were available when and where clients needed them."*
>
> — Cheick Touré, country leader in Mali

CASE STUDY

During the height of the COVID-19 pandemic, the governments of Mali and Kenya partnered with IntraHealth to mobilize and prepare health workers fast. Together we used data from iHRIS and other national information systems to model when and where outbreaks would be worst.

iHRIS mobile user interface

GOVERNMENTS & MEDICAL PROFESSIONAL COUNCILS HAVE USED iHRIS DATA TO:

➤ deploy the right mix of health workers to the right place at the right time

➤ ensure health workers are up to date on their credentials

➤ advocate for additional funding

➤ plan for future health worker needs

➤ streamline license application & renewal
